93000	2010			
	2011	All brass production ends by January.		

Selmer notes:

1. Selmer produced horns in batches of 33 with valve numbers running from 1-99, in order to retain valve data on each instrument so that a replacement could be made easily.

2. A Selmer Balanced model trumpet marked “25B” on the LP has a 0.472” bore.

3. Serial numbers up to early 1980s are from www.rouses.net/trumpet/selmer.htm with modifications as more information comes in.

4. Years that models started are from the Selmer website history section.

Selmer Cornets
